

## **Orca - 30-Second – Captioned for the Visually Impaired**

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

The killer whale, or orca, can be found in the oceans surrounding Canada.

*[Orca swimming and diving in the ocean]*

This intelligent mammal is at the top of the food chain.

*[Orca swimming and diving in the ocean]*

Already a species at risk, orcas are threatened by toxins found in what they eat.

*[Water with green stains of pollution]*

We need to keep our oceans clean if we want the killer whale to have a future, and that's just a start.
