

## **Rainforests - 30-Second – Captioned for the Visually Impaired**

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

Up to one-quarter of the world's coastal temperate rainforests are in British Columbia, and they are among the most productive ecosystems on Earth.

*[Images of the forest, mushroom and spider web]*

Everything in the forest has a role, from 400-year-old trees that shelter nesting birds to fallen logs that support new life.

We must all work together to conserve the rainforest.

*[Bear in a river]*
