

## **Tundra - 30-Second – Captioned for the Visually Impaired**

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

In Canada's Far North you'll discover the tundra. Some tundra species live here year-round and must adapt to winters with temperatures as low as -50 degrees Celsius.

*[A artic hare, a polar bear on his back]*

Other animals migrate here during the summer when plant life bursts from the soil.

*[Bird taking off, chick, river and flowers]*

The tundra is home to many species at risk, like the barren-ground caribou and Porsild's bryum, a kind of moss.

*[A fox walking on the snow]*
