

The Wolverine - 30-Second – Captioned for the Visually Impaired

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

The wolverine is one of Canada's most solitary animals. Its territory can cover more than 1,500 kilometres.

[Wolverine in a tree]

Wolverines will defend their food from much larger animals, giving them a reputation of fearlessness.

[Wolverine running, black bears, a wolf]

However, human activities have affected its survival. Today, wolverines are endangered in Eastern Canada. We need to help this iconic animal survive. And that's just a start.
