

## **The Chipmunk - 60-Second – Captioned for the Visually Impaired**

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER: (V.O.):

Chipmunks are the smallest members of the squirrel family.

*[A chipmunk on a rock]*

They're found in most parts of North America and Asia. Fallen logs, tree stumps, piles of brush, or rock provide good homes.

*[A chipmunk on a rock eating]*

Seeds are the main source of food, and much of a chipmunk's daily activity is spent in collecting them. When the cheek pouches are full, the chipmunk stores the seeds in its nest, or caches them on the ground, covering them with leaves and other litter.

*[A chipmunk on a the ground]*

For a more complete story on the chipmunk, why not contact the Canadian Wildlife Service in Ottawa.
