

Pollinators - 30-Second – Captioned for the Visually Impaired

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

Roughly one out of every three bites of food we eat is thanks to pollinators, the animals that plants rely on to reproduce.

[Insects and hummingbird gathering pollen]

Without these important insects and birds, we wouldn't have many fruits and vegetables. We wouldn't even have chocolate.

[Baskets of fruits, vegetables and chocolate]

Sadly, many pollinators are threatened by habitat loss and pesticide use. But you can help protect these precious species.

[Construction site, man using pesticide on his grass]
